DETAILED ACTION

Response to Amendment

This communication is in response to the amendment of 12/06/2007. All changes made to the Claims have been entered. Accordingly, Claims 1, 3, 5-10, 12-17, 19-22, 25-30 are currently pending in the application.

Allowable Subject Matter

1. Claims 1, 3, 5-10, 12-17, 19-22, 25-30 allowed.

2. The following is an examiner's statement of reasons for allowance:

Claim 1, 10, 17, 22, and 28 is allowable over the prior art of record since the cited references taken individually or in combination fail to particularly disclose

setting a pipe value based on adding a maximum segment size capable of being sent by a sending host to a difference between a maximum sequence number sent so far and a lowest sequence number that is not yet acknowledged, and resetting an initial value of a congestion window and wherein data is transmitted if the pipe value is less than a congestion state window. It is noted that the closest

prior art, Sarolahti et al, "F-RTO: An Enhanced Recovery Algorithm For TCP

Retransmission Timeouts", hereinafter referred to as Sarolahti discloses a recovery

algorithm for TCP retransmission timeouts. However the stated prior art fails to disclose or render obvious to the above underline limitations as claimed.
